Bio

Risk of Death is a one-woman, fictional band out of Maricopa, AZ

Risk of Death is a one-woman, fictional band out of Maricopa, AZ. Our goal is to have fun through creating - music community opportunity experiences. We perform a unique blend of rock, punk, and metal music that is sure to get your heart racing. Since our inception in 2023, we have been creating music that speaks to our fans and connects the community.

The YouTube channel, [Hate5Six](#), changed Maz's life. After seeing Capra perform live, then GEL, then attending a yard show to see GEL in late 2022, she knew that hardcore was what had been missing from her life. For years, Maz had been craving harder, heavier music that meant something as well as a creative outlet from a mundane, corporate hell hold.

Having been a metal fan for about 20 years, a friend asked Maz what her favorite band of all the time, Tool, made her feel. She couldn't find an answer right then and there. When she found hc later that year, the soon to be songwriter realized that the metal she had been listening to made her feel nothing; memories, hurt, anger were being suppressed to keep her numb from the reality she had created for herself. HC made Maz dig deeper into what was going on with her mental health.

Pig City, THRA, SaintBreaker, Hostile Fate, Sawza, are some of the local bands that have inspired the vocalist to continue supporting the AZ hc scene and to start something of her own. Being a noob to hc metal and punk, she also does her homework and appreciates bands such as Discharge, Dead Kennedys, and Suicidal Tendencies.

Influences

Some of Maz's all time favorite bands and artists, regardless of genre, include: System of Down, Melvins, Ministry, Sade, Mariah Carey, Nas, Mobb Deep, and Sister Rosetta Tharpe.
